### **NAAMTA Global Announces Medical Transport Accreditation for Eagle III**

After an independent, external evaluation of administrative documentation, medical practices, and operational processes, [Eagle III](#) has been awarded Medical Transport Accreditation for its rotor-wing medical transport program by the National Accreditation Alliance of Medical Transport Applications ([NAAMTA Global](#)). The scope of accreditation includes basic life support, advanced life support, and critical care medical transport services.

NAAMTA's accreditation program is built on standards that focus on quality patient care, transport safety, and organizational reliability across the continuum of medical transport services. The accreditation process is founded on a service-based, consultative, and educational framework designed to promote best practices and continuous improvement within accredited organizations. NAAMTA accreditation is widely recognized by industry peers, third-party payers, medical organizations, liability insurance providers, regulatory authorities, and the public as a symbol of quality and accountability.

Through the accreditation process, [Eagle III](#) demonstrated compliance with all applicable NAAMTA standards and requirements for rotor-wing operations and multi-level medical practice. Compliance was verified through a comprehensive review of policies and procedures, employee interviews, process evaluations, and operational assessments conducted in accordance with [ISO 9001:2015](#) auditing guidelines.

In addition to the accreditation award, Eagle III Medical Transport joins the NAAMTA Alliance—an international network of accredited organizations committed to advancing transport safety, clinical quality, and operational excellence through shared learning, collaboration, and continuous performance improvement.

Shaun Stamnes states, "The NAAMTA Standards are well thought out and grounded in safety and quality improvement. The evaluation process and the level of support provided by the NAAMTA staff were exceptional. The process was straightforward, well organized, and significantly improved from previous years. Knowing that NAAMTA holds itself to the same level of accountability through its own audit process and applies standards consistently is what ultimately drew us to NAAMTA accreditation."

Roylen Griffin, NAAMTA Executive Director comments, "Eagle III's commitment to safety, clinical excellence, and disciplined operational practices was evident throughout the accreditation process. Their team demonstrated a strong culture of accountability and continuous improvement that aligns well with NAAMTA's standards and mission."

## About NAAMTA Global

NAAMTA Global, with over 15 years in business, has been a trailblazer in setting standards for best practices and performance among medical escort, medical transport, and emergency medical service providers, gaining international recognition. As a premier global accreditation entity, NAAMTA offers standardized criteria and procedures that emphasize transport safety, patient care, quality management, and continuous improvement.

NAAMTA's [ISO 9001 Quality Management System](#), which is registered and annually audited by [PRI Registrar](#), an [ANSI-ASQ National Accreditation Board-approved](#) registrar. NAAMTA is recognized for integration of quality and safety management elements as part of all NAAMTA accreditation standards.

With its dynamic auditing approach and comprehensive suite of web-based tools, NAAMTA stands out as a leader in accreditation, providing exceptional member services and significantly enhancing practices within the medical transportation industry.

## About Eagle III

EAGLE III, based in Green Bay, Wisconsin, provides emergent air medical transport throughout Northeast Wisconsin and the surrounding region, ensuring patients have rapid access to advanced medical care when every minute counts.

Each mission is staffed by highly trained flight clinicians with advanced expertise in emergency and critical care, delivering lifesaving care from the moment patients enter the aircraft until arrival at the receiving hospital. This commitment to patient care, clinical excellence, and operational safety is reflected in EAGLE III's continued accreditation by the National Accreditation Alliance for Medical Transport Applications (NAAMTA), a nationally recognized standard for medical transport programs.
