NAAMTA Global Recognizes Jet ICU's Continued Commitment to Medical Transport Accreditation

5 September 2025 – [NAAMTA Global](http://naamtaglobal.com) is pleased to recognize [Jet ICU](http://jeticu.com) as part of the NAAMTA Alliance. Jet ICU's continued participation reflects its commitment to quality patient care, transport safety, and continuous improvement in fixed-wing medical transport.

NAAMTA's accreditation program is built on standards that focus on quality patient care, transport safety, and organizational reliability across the continuum of medical transport services. The accreditation process is founded on a service-based, consultative, and educational framework designed to promote best practices and continuous improvement within accredited organizations. NAAMTA accreditation is widely recognized by industry peers, third-party payers, medical organizations, liability insurance providers, regulatory authorities, and the public as a symbol of quality and accountability.

Through the accreditation process, [Jet ICU](http://jeticu.com) demonstrated compliance with all applicable NAAMTA standards and requirements for fixed-wing operations and multi-level medical practice. Compliance was verified through a comprehensive review of policies and procedures, employee interviews, process evaluations, and operational assessments conducted in accordance with [ISO 9001:2015](http://iso9001.com) auditing guidelines.

In addition to the accreditation award, Jet ICU joins the NAAMTA Alliance—an international network of accredited organizations committed to advancing transport safety, clinical quality, and operational excellence through shared learning, collaboration, and continuous performance improvement.

Since our initial accreditation in 2013, Jet ICU has experienced significant growth from a small fleet operation to a global air medical provider with more than 15 aircraft, over 100 employees, and the recent groundbreaking of a 40,000-square-foot, state-of-the-art hangar facility at Tampa International Airport. NAAMTA has been a cornerstone of that growth. Their standards and collaborative approach have helped guide our commitment to safety, clinical excellence, and operational integrity as we continue to expand while maintaining the highest standards in patient care.”

Roylen Griffin, NAAMTA Executive Director states, “Jet ICU's accreditation reflects a demonstrated commitment to meeting rigorous standards across the full spectrum of medical transport care. Their verified capabilities in basic, advanced, and critical care transport align with NAAMTA's mission to recognize organizations that prioritize patient safety, clinical excellence, and operational integrity.”

About NAAMTA Global

NAAMTA Global, with over 15 years in business, has been a trailblazer in setting standards for best practices and performance among medical escort, medical transport, and emergency medical service providers, gaining international recognition. As a premier global accreditation entity, NAAMTA offers standardized criteria and procedures that emphasize transport safety, patient care, quality management, and continuous improvement.

NAAMTA's [ISO 9001 Quality Management System](#), which is registered and annually audited by [PRI Registrar](#), an [ANSI-ASQ National Accreditation Board-approved](#) registrar. NAAMTA is recognized for integration of quality and safety management elements as part of all NAAMTA accreditation standards.

With its dynamic auditing approach and comprehensive suite of web-based tools, NAAMTA stands out as a leader in accreditation, providing exceptional member services and significantly enhancing practices within the medical transportation industry.

About Jet ICU

Jet ICU is a global air medical transport provider specializing in fixed-wing critical care evacuation and medical repatriation services. Headquartered in Tampa, Florida, Jet ICU operates a fleet of medically configured aircraft staffed by experienced pilots, flight paramedics, and critical care clinicians capable of supporting basic, advanced, and critical care transports worldwide.

The organization provides hospital-to-hospital transfers, international repatriations, and specialized mission support for government agencies, travel assistance companies, cruise lines, and healthcare systems. Jet ICU maintains integrated operational, clinical, and safety management programs designed to ensure continuity of care and safe transport throughout each mission.

Since its founding, Jet ICU has expanded rapidly while maintaining a strong safety culture and commitment to clinical quality. The company now operates a fleet of more than 15 aircraft and employs over 100 professionals across aviation, medical, and operational roles. Jet ICU is currently developing a new 40,000-square-foot hangar facility at Tampa International Airport to support continued growth and operational readiness.
