

PRESS RELEASE

FOR IMMEDIATE RELEASE: June 2, 2026

NAAMTA Global Awards Medical Transport Accreditation Renewal to Survival Flight, Inc.

Second accreditation cycle recognizes Survival Flight's commitment to fixed- and rotor-wing air medical transport, patient care, and safety

Batesville, Arkansas – June 2, 2026 – [NAAMTA Global](#) is pleased to announce that [Survival Flight, Inc.](#) has earned renewal of its [NAAMTA Medical Transport Accreditation](#) for its fixed-wing and rotor-wing air medical transport operations.

The accreditation was awarded on April 28, 2026, and remains valid through April 30, 2029. This renewal marks Survival Flight's second NAAMTA accreditation cycle and recognizes the organization's continued focus on patient care, transport safety, clinical oversight, quality management, and operational readiness.

Headquartered in Batesville, Arkansas, Survival Flight provides emergency medical transportation services for adult and pediatric patients requiring basic life support, advanced life support, and critical care levels of care. With operations spanning eight states and a growing network of air medical bases, Survival Flight supports rural and urban communities by expanding access to timely, clinically appropriate medical transport.

NAAMTA accreditation includes an independent evaluation of administrative documentation, flight operations, medical practices, operational procedures, clinical processes, safety practices, quality management systems, and applicable facilities. Through the accreditation process, Survival Flight demonstrated compliance with NAAMTA's medical transport standards and provided evidence supporting its commitment to safe, high-quality patient transport.

*"Survival Flight's renewed accreditation reflects the organization's strong engagement throughout the accreditation process," said **Amy Arndt, Operations Director of NAAMTA Global**. "Their leadership, base personnel, and operational teams demonstrated a clear focus on patient care, flight operations, safety practices, and continuous improvement."*

Survival Flight's renewal also highlights the role of accreditation in supporting a shared culture of accountability across clinical, aviation, communications, maintenance, and support teams.

*"Accreditation is more than a recognition of compliance; it is a reflection of the culture our crews, communications specialists, mechanics, pilots, clinicians, and support teams have built every day," said **Chris Millard, President of Survival Flight**. "This renewal demonstrates our commitment to delivering safe, reliable, and clinically excellent care to patients and communities."*

NAAMTA's accreditation process is designed to support medical transport organizations through structured standards, documentation review, operational evaluation, and a commitment to continuous compliance. The process helps organizations demonstrate that policies, procedures, training, patient care practices, safety processes, and internal assessments are aligned with recognized medical transport expectations.

As a NAAMTA-accredited organization, Survival Flight joins the NAAMTA Alliance, a network of accredited organizations committed to improving patient care, strengthening safety practices, and supporting continuous improvement throughout the medical transport industry.

About Survival Flight, Inc.

Survival Flight, Inc. is an emergency medical transportation provider headquartered in Batesville, Arkansas. The organization provides fixed-wing and rotor-wing air medical transport services for adult and pediatric patients requiring basic life support, advanced life support, or critical care transport.

Survival Flight operates across eight states with a growing network of air medical bases and maintains its own 24/7 operational control center staffed with operational control personnel and certified meteorologists. The organization is committed to supporting patients, families, pilots, crews, and communities through safe, timely, and clinically focused medical transport services.

About NAAMTA Global

NAAMTA Global provides accreditation services for medical transport organizations, including fixed-wing, rotor-wing, ground, and medical escort programs. NAAMTA accreditation supports quality management, patient safety, clinical and operational standards, and continuous improvement within the medical transport industry. Through its accreditation process, NAAMTA evaluates documentation, policies, procedures, operational practices, and evidence of compliance with established medical transport standards.

NAAMTA's ISO 9001 Quality Management System is registered and annually audited by PRI Registrar, an ANSI National Accreditation Board-approved registrar. NAAMTA integrates quality and safety management principles throughout its accreditation standards and processes.
